DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Keith Murphy on February 2, 2007.

The application has been amended as follows:

IN THE CLAIMS:

Please cancel claim 49.

Allowable Subject Matter

1. Claims 1-48,50 are allowed.
2. The following is an examiner's statement of reasons for allowance: in the environment of a system for communicating with a down hole tool the closes prior art Hill et al '492 fails to teach or suggest a communication system comprising, a first tool for measurement while drilling including a first transceiver, a second transceiver in the first tool or a second tool for measurement while drilling and an external instrumentation interface, a bus system having a first and second conductive connection in communication with the first and second transceivers, wherein the first and second transceivers employ Quadrature

Art Unit: 2612

Amplitude Modulation or Discrete Multi-Tone modulation, the bus system further carries a combined communication signal including a modulated communication signal or a power signal and an existing communication signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cooper et al '592 discloses a bus system for connecting a plurality of tools and Meek et al '712 a system having a plurality of transceivers in each downhole tool. Examiner had no motivation to combine these references.
